PROFESSIONAL SUMMARY

DevOps / Cloud Engineer focused on building and operating reliable AWS platforms. Experienced in infrastructure design and delivery, RHEL administration, ITSM/incident workflows, and IAM governance. Strong automation mindset with a practical, production-first approach to stability, security, and continuous improvement.

EXPERIENCE

Senior DevOps Engineer

09/2025 - Present

Vivicta - Slovakia (Remote)

- Designed and maintained standardized Terraform modules for AWS infrastructure, creating reusable modules per resource (EC2, TGW, networking, IAM, etc.) to enable rapid and consistent onboarding of new AWS clients.
- Led the infrastructure standardization initiative, reducing environment setup time and ensuring consistent security and architectural patterns across multiple customer AWS accounts.
- Implemented an event-driven incident automation system using Amazon EventBridge and CloudWatch Alarms, automatically creating incidents in ServiceNow when alarms entered ALARM state and auto-closing incidents when alarms returned to OK.
- Improved incident response efficiency by eliminating manual incident lifecycle management, aligning AWS monitoring with ITSM workflows.
- Acted as the primary AWS subject-matter expert for the team, providing guidance on cloud architecture, automation, monitoring, and best practices.
- Handled incident management and service requests related to AWS infrastructure and Linux systems, including troubleshooting, root cause analysis, and remediation.

Senior Cloud Infrastructure Engineer

12/2024 - 08/2025

Accenture - Bratislava, Slovakia

- Built and packaged a unified Python CLI consolidating multiple Amazon Web Services automation scripts into a single tool; improved maintainability and drove adoption across teams while cutting routine operations from minutes to seconds (approximately 5x faster).
- Automated EC2 decommissioning end-to-end using Python + REST APIs, integrating Red Hat tooling (Satellite / Insights), reduced a ~30 minute manual runbook to seconds/a few minutes, and significantly reduced human error by removing manual steps.
- Developed a self-service backup workflow integrating ServiceNow with AWS services (API Gateway, Lambda, EventBridge, AWS Backup), enabling users to trigger/schedule backups without engineer involvement and reducing after-hours intervention.
- Deployed and maintained the solution using Terraform (IaC) to ensure repeatable, scalable rollouts across environments.
- Collaborated with cross-functional teams to deliver secure, reliable cloud automation; continuously improved operational processes through performance optimization and security hardening.
- Mentored junior engineers on AWS automation and Linux operations, raising team capability and standardizing best practices.

Cloud Infrastructure Engineer

02/2023 - 11/2024

Accenture - Bratislava, Slovakia

- Developed Python automation scripts for AWS resource management, including EC2 backups, instance lifecycle operations, and automated restoration from AMIs. These scripts reduced manual intervention, improved efficiency, and ensured high availability of cloud resources across multiple environments.
- Designed and implemented a custom file synchronization tool, similar to rsync, enabling real-time replication across multiple directories. This solution was tailored to the client's specific needs, ensuring data consistency and reliability while significantly reducing the risk of file discrepancies.
- Managed and maintained a fleet of Linux hosts, overseeing system administration, Red Hat Enterprise Linux (RHEL) patching, and troubleshooting infrastructure-related issues. Took part in regular on-call rotations, providing critical support for incident resolution and minimizing downtime. Created and optimized Bash scripts and Ansible playbooks to automate repetitive sysadmin tasks, improving system efficiency and reducing human errors.
- Gained hands-on experience with Red Hat Satellite, Hybrid Cloud Console, and enterprise Linux environments, leveraging these tools for system provisioning, patch management, and infrastructure monitoring to ensure optimal performance and compliance with security standards.

Transitional Tax Analyst

05/2022 - 01/2023

KPMG Global Services Hungary - Budapest, Hungary

Information Technology Technician Internship

03/2022 - 04/2022

MET Group - Budapest, Hungary

EDUCATION

MSc in Data Engineering

09/2021 - 07/2022

University of Buckingham

BSc in Business and Diplomacy

09/2018 - 07/2021

University of Buckingham

CERTIFICATES

AWS Certified DevOps Engineer – Professional

AWS Certified Cloud Practitioner

AWS Certified Developer – Associate

Microsoft Certified: Azure Fundamentals - AZ900

AWS Certified Solutions Architect – Associate

ITIL Foundation

SKILLS

Amazon Web Services (AWS)	Advanced	Terraform	Advanced
Bash Scripting	Advanced	Docker	Intermediate
Python (Programming Language)	Advanced	Kubernetes	Intermediate
Linux System Administration	Advanced	Ansible	Intermediate
GitLab CI, GitHub Actions	Advanced	Azure & GCP	Foundational

LANGUAGES

English	Native	Czech	Fluent
Hungarian	Native	German	B1 (in progress)
Slovak	Fluent
